

AEROSOL ADHESIVES

For quick adhesion with the push of a button, Bostik SuperTak™ Aerosol Adhesives are an excellent choice. They make the job move along with ease and greater efficiency. From fast-grabbing temporary bonds to bonds with the strength of conventional contact cement, these adhesives fit a broad range of needs.

GENERAL PURPOSE

SuperTak General Purpose Adhesive has good initial grab for temporary or permanent bonding of light materials in assembly jobs and maintenance applications. It is an excellent all-purpose adhesive.

HIGH PERFORMANCE

The one-surface bond strength and extended working time of SuperTak High Performance Adhesive formula makes it ideal for bonding porous and non-porous materials such as pool liners, insulation and carpets.

FOAM AND FABRIC

SuperTak Foam and Fabric Adhesive delivers instant tack and strong, soft bonds that won't dimple. With a controlled lace spray pattern and low soak characteristics, it assures neat application and minimal waste in upholstery applications.

PRESSURE SENSITIVE

SuperTak Pressure Sensitive Adhesive delivers a light, temporary bond in a controlled pattern. It is the choice for applications requiring repositioning capability such as pattern-making, floral and craft assembly, and graphic arts.

CONTACT TYPE

SuperTak Contact Type Adhesive provides high strength, consistent coverage and heat resistance needed for such jobs as bonding laminates, counter tops and moldings. With quick tack and a one minute dry time, SuperTak Contact Type Adhesive is the handy alternative to conventional contact cement.
