

HOT MELT ADHESIVES

The more than 50 formulations of Bostik Hot Melt Adhesives offer a quick, clean and economical way to bond a wide variety of materials from wood, metal and glass to hard-to-bond plastics and vinyl. There are formulations with the right viscosity, shear and peel strength, heat and cold resistance, and open time to handle specific industrial and construction jobs precisely.

Hot Melts are non-toxic and non-flammable. They save energy because they require less energy to melt than water or solvent-based adhesives require to dry or cure.

Bostik Hot Melts are available in all popular forms: rope, pellet, slat, granule, sticks and cartridges. And, many of the formulations are resistant to most solvents used in today's stains and varnishes.

GLUE CARTRIDGES

Bostik 1" glue cartridges are designed to provide the right delivery rate to speed application. Several formulations are available and offer a range of properties for bonding a variety of materials.

Bostik Hot Melt Cartridges are ideal for most industrial and construction applications—from packaging and product assembly to store displays and cabinet making.

GLUE STICKS

Bostik 1/2" diameter glue sticks are ideal for use with hand-held glue guns. They are available in a broad range of formulations for applications involving wood, plastics, metals, glass and other porous materials.

Choose a variety of strengths, flexibilities, temperature resistances, colors and open times for light production bonding and assembly jobs in woodworking, floral and crafts, electronics and more.

GLUE GUNS

Bostik all-electric glue guns are lightweight and rugged. Designed for use with 1/2" glue sticks, they offer comfortable, reliable one-hand operation. Two models are available for large and small jobs around the plant or construction site.

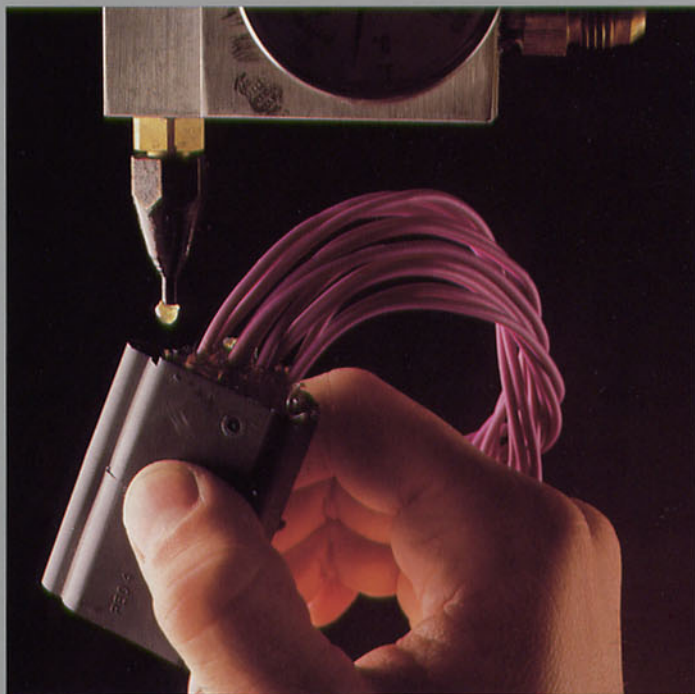

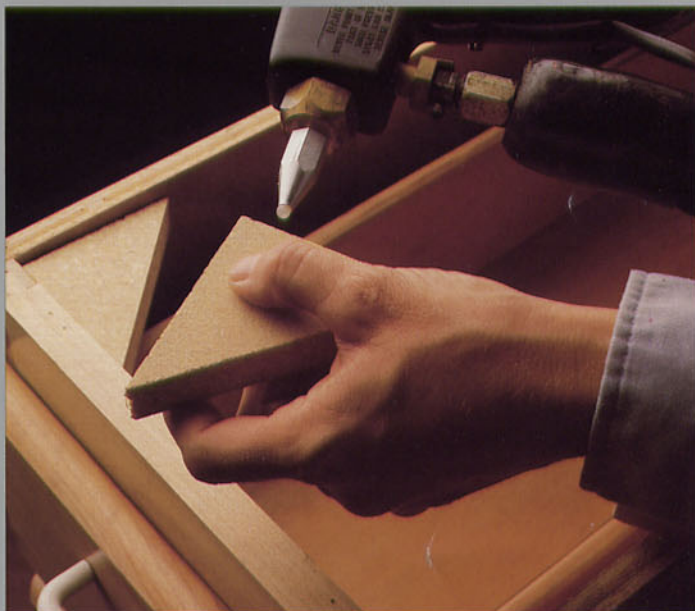

TG3 Delivering 1.4 pounds of adhesive per hour, the TG3 is ideal for jobs such as small case closing, potting and repairs.

TG4 An industrial-quality gun that delivers more than 4 pounds of glue per hour. It features solid state design and five interchangeable nozzles. This all-purpose gun is ideal for product assembly, construction and small repairs.

BULK HOT MELTS

For large production operations, Bostik Bulk Hot Melt Adhesives offer the best economy and performance. Available in all bulk-type forms, the range of properties include open times from 2 to 60 seconds and temperature resistances from -50° to 300°F. Over 50 formulations bond substrates from wood, metal and glass to hard-to-bond plastics and vinyl.

REFER TO THE SUBSTRATE SELECTION GUIDE ON PAGES 16-17 FOR APPLICATION DATA. REFER TO PAGES 20-21 FOR HOT MELT TECHNICAL DATA.

Bostik hot melts, in many cases, can replace mechanical fasteners more economically and with greater quality results. A vast range of properties, including electrical, make them ideal for a variety of applications from cabinet assembly to potting switches and other electrical components.
