

# MAINTENANCE AEROSOLS

**Bostik Maintenance Aerosols keep parts and equipment running smoothly and efficiently. Clean, safe and handy to store, they offer Bostik quality in push-button convenience of a spray.**

## **PENETRATING OIL**

Bostik Penetrating Oil helps free rusted nuts and bolts and prevents corrosion. Its four-way action penetrates, lubricates, displaces moisture and prevents rust.

## **SAFETY SOLVENT**

Non-flammable Bostik Safety Solvent dissolves grease and oil from metal surfaces and prepares parts for bonding or painting. It dries fast and leaves no residue.

## **SILICONE LUBRICANT\***

Bostik Silicone Lubricant safely waterproofs and protects metal, rubber and plastic, leaving no oily residue. It is perfect for applications that require a clean, safe, non-petroleum lubricant.

## **TFE LUBRICANT\***

Dry film Bostik TFE Lubricant provides long term lubrication and reduces friction and

wear on metal, wood and plastics. Keeping saw blades free from sticking is just one of the many uses. It is also recommended as a mold release agent.

## **GASKET REMOVER\***

Bostik Gasket Remover lifts off baked-on gaskets of cork, rubber, asbestos, silicone and anaerobics, leaving a clean surface for a new gasket.

## **BELT DRESSING\***

Regular use of Bostik Belt Dressing extends the life of all types of flat and V-belts while it improves grip and efficiency.

\*USDA authorized for use in federally inspected meat and poultry plants.

In the plant or on the job site, Bostik maintenance aerosols are convenient solutions to a range of common maintenance problems. Penetrating Oil, for example, is indispensable to keep parts moving freely and prevent corrosion on metal surfaces.
