

All Seals' Fluorocarbon Compounds

COMPARABLE TO VITON™, EXCEPT FOR THE PRICE

Viton™ by Chemours™ is an excellent quality O-Ring compound that we proudly stock and highly endorse. However, many applications simply don't require a compound of Viton™'s pedigree – and price. In other words, alternative fluorocarbon compounds may be justified for your particular needs.

The fact is, some applications are suitable to utilize seals made from All Seals' fluorocarbon compounds. The material will allow your operation to achieve comparable performance at significant cost savings!

Our fluorocarbon compound is available in the same colors as Viton, and it's tested to meet the specifications listed at the right.

WHO KNOWS SEALS BETTER THAN ALL SEALS

With over five decades of international leadership, All Seals is the premier authority on sealing solutions. We stock and offer virtually every known sealing solution compound – even a few high performers that aren't so well known. And we constantly test our products and suppliers for the utmost quality control. As the details to the right point out, if the quality isn't top-grade, it doesn't enter our warehouse.

IS OUR ECONOMICAL FLUOROCARBON SOLUTION THE RIGHT CHOICE FOR YOU?

Contact us and we'll give you an honest answer – one that could save you up to 20%. If you really need to use Viton, we'll let you know. If not, we'll save you money. Tell us your application, specifications, demands and expectations. We'll recommend the perfect sealing solution for the most economical price.
